

FY 2017 Earnings Call

March 6, 2018

Rolf Buch, CEO

Dr. A. Stefan Kirsten, CFO

| | |
|---|----------------|
| 1 | Highlights |
| 2 | FY2017 Results |
| 3 | Housekeeping |
| 4 | Wrap-up |
| 5 | Appendix |

Reporting annual results for the fifth time since the IPO, Vonovia once again delivered on all metrics and continued on its sustainable growth trajectory

| | |
|---------------------------------|--|
| <h3>Operations</h3> | <ul style="list-style-type: none"> ➢ Organic rent growth accelerated to 4.2% in 2017 (+90bps) ➢ EBITDA margin of 73.2% incl. maintenance (+230bps) ➢ Cost per unit down to €526 (-7.7%) ➢ Adj. EBITDA Operations €1,224.2m (+11.9%) |
| <h3>FFO 1</h3> | <ul style="list-style-type: none"> ➢ €920.8m (+21%) ➢ €1.90 per share, eop NOSH (+16.3%) ➢ €1.93 per share, avg. NOSH (+18.4%) |
| <h3>Valuation and Adj. NAV</h3> | <ul style="list-style-type: none"> ➢ Aggregate value growth of €4,229m in 2017 (+14.8% I-f-I), of which 3.0% from performance, 3.0% from investments and 8.9% from yield compression ➢ Fair value of €1,475 per sqm and 19.7x in-place rent multiple ➢ Adj. NAV of €38.49 per share (+25.2%) |
| <h3>Governance</h3> | <ul style="list-style-type: none"> ➢ The Supervisory Board of Vonovia SE will propose to the AGM to be held on May 9, 2018, the election of Jürgen Fitschen as Member of the Supervisory Board. If elected, the Supervisory Board intends to elect Jürgen Fitschen as its Chairman. ➢ CFO Dr. Stefan Kirsten will step down from Vonovia's Management Board at his own request, effective from the end of the 2018 AGM to enable the company to take the next steps in its development under the financial leadership of Helene von Roeder as CFO of Vonovia SE, who will assume joint responsibility for all financial functions. |

16.3% FFO 1 Growth on a Broadly Stable Portfolio

- On a broadly stable portfolio (+2.3% more residential units on average), Vonovia delivered 8.4% rental income growth, 11.9% Adj. EBITDA Operations growth and €160m FFO 1 growth, equaling +16.3% FFO 1 growth per share (in spite of 4.1% NOSH growth as a result of scrip dividend, conwert acquisition and Gagfah legal merger)

| | | FY2017 | FY2016 | Delta | |

Invest Cluster Offers Long-Term Organic Growth Potential

- **92% of the total portfolio** is allocated to the two strategic clusters **Operate** and **Invest**, with another 5% earmarked for privatization.
- More than 217k units in the Invest cluster (61% of total fair value) safeguard **sufficient potential for the annual €1bn investment volume**.

| Dec. 31, 2017 | Residential | In-place rent | Vacancy rate | Fair value | |
|------------------------------------|----------------|---------------|--------------|-----------------|-------------|
| | units | (€/sqm/month) | (%) | (€bn) | % of total |
| Operate | 101,697 | 6.55 | 2.3 | 10,252.9 | 31% |
| Invest | 217,317 | 6.22 | 2.2 | 20,255.1 | 61% |

| Freiburg | 545 | 1,949 | 23.0 | 8.2% |
| Other Strategic Locations | 2,103 | 1,404 | 18.4 | 6.5% |
| Total Strategic Locations | 31,908 | 1,495 | 19.8 | 8.9% |

Total fair value growth from performance, investments and yield compression

Top 3 Regional Markets by individual value drivers

Yield compression

Berlin (13.2%)

Hanover (12.4%)

Rhine Main (11.6%)

Modernization

S. Ruhr Area (6.0%)

Hanover (4.9%)

Westphalia (4.5%)

Performance

Leipzig (6.0%)

Dresden (5.9%)

Berlin (5.8%)

- As part of the preparation of the IFRS annual accounts, an impairment test was conducted to test if any of the goodwill on the balance sheet needs to be impaired.
- The 2017 WACC (post tax) was 3.60% after 3.10% for 2016.
- The increase in WACC is primarily driven by a higher base rate and lower debt leverage.
- The higher WACC results in an **impairment of the full goodwill amount allocated to Vonovia's Region East (predominantly Berlin) of €337m.**
- **No impairment in any other region.**
- A WACC level similar to last year would have resulted in the same headroom as last year, supporting the view that the value growth seen in 2017 is supported by operating cash flow growth.

No impact on Adj. NAV, as the impairment only affects the goodwill and hence the EPRA NAV

Conservative Valuation Levels

- In-place values are still way below replacement values, in spite of accelerating valuation growth in recent years.

Note: VNA 2010 – 2014 refers to Deutsche Annington Portfolio at the time; construction costs excluding land. The land value refers to share of total fair value allocated to land.
 Source for market costs: Arbeitsgemeinschaft für zeitgemäßes Bauen e.V.

Concept

- Expansion of core business to extend the value chain by offering additional services and products that are directly linked to our customers and/or the properties and offer the same cash flow stability as the rental business.
- Insourcing of services to ensure maximum process management and cost control.
- Two types of Value-add Business
 1. External income (e.g. multimedia, smart metering)
 2. Internal savings (e.g. craftsmen, resi environment)
- New initiatives always follow same low risk pattern of
 - Prototype development
 - Proof of concept in pilot phase
 - Roll-out across portfolio

Economics

- NAV does not account for Vonovia's Value-add Business.
- Applying the impairment test WACC¹ to the 2018E Adj. EBITDA Value-add Business translates into an additional value of ~€5.3 per share (~14% on top of current Adj. NAV).

| Penetration | |
|--------------------------------------|--|
| Multimedia | ca. 80% |
| Smart metering | ca. 23% |
| Residential environment ² | ca. 30% |
| Energy | <1% |
| Craftsmen VTS | ca. 70% (maintenance) ca. 30% (modernization) target is around 70% to allow for enough flexibility in the volumes and to enable continuous benchmarking to market prices |

Adj. EBITDA Value-add Business (€m)

¹ Pre-tax WACC of 4.68% as per Dec. 31, 2017. ² Gardening and landscaping work

Sales – Steady Cash Flow at Attractive Margins

- In spite of value growth of the portfolio, privatization margins are still above 30% and the margin on non-core sales increased to 7.9% from 5.4% in 2016.
- The fair value step-up in privatization excl. smaller package deals was 35.0%.

| | Privatize Portfolio | | Sell Portfolio | | TOTAL | |
|------------------------------------|----------------------------|-------------|-----------------------|-------------|--------------|-------------|
| | 2017 | 2016 | 2017 | 2016 | 2017 | 2016 |

| Non-core (number of units) | 11,780 | opportunistic |
| FV step-up (Sell Portfolio) | 7.9% | >0% |
| Dividend/share | €1.32 ¹ | ~70% of FFO1 |

Note: Excluding any impact from potential Buwog acquisition.

¹ Intended to be proposed to the 2018 Annual General Meeting. ² Based on current number of 485.1m shares outstanding.

- Since indicating international interest Vonovia has seen a steady level of interest from Europe-wide brokers with investment opportunities. So far, these opportunities are mostly small in scale
- Cooperation with cdc habitat in France (formerly "SNI"):
 - Benchmarking workshops carried out between November 2017 and January 2018
 - Basics of operations considered very similar (e.g. demand profile and type of tenants)
 - Supply side structures differ in the regulation of social housing
 - Vonovia more advanced in industrialization and efficiencies in leveraging its platform (Value-add Business)
 - Next steps: Detailed areas of co-operation currently being considered

Vonovia will continue to explore opportunities in large European metropolitan areas in line with our established acquisition criteria

- Following the passing of Vonovia SE's former Chairman of the Supervisory Board, **Dr. Wulf H. Bernotat**, in late August 2017, Supervisory Board Member **Prof. Dr. Edgar Ernst** had been appointed Interim Chairman until the next Annual General Meeting.
- The next AGM is scheduled for May 9, 2018, in Bochum, and Vonovia's Supervisory Board will propose **Jürgen Fitschen** as new member of the Supervisory Board. Following an approval by the AGM, Jürgen Fitschen is expected to be elected as the new Chairman of the Supervisory Board.
- As previously announced, if the tender offer for Buwog AG is successful, **Vitus Eckert**, currently Chairman of Buwog AG's Supervisory Board, will be proposed as new member to the Supervisory Board of Vonovia SE.

- As announced on August 4, 2017, **Gerald Klinck** will not seek an extension of his contract as Member of the Management Board of Vonovia SE and leave the Board upon termination of his current contract following the Annual General Meeting on May 9, 2018.
- As announced on January 23, 2018, **Helene von Roeder** has been appointed to Vonovia SE's Management Board and will take over Gerald Klinck's responsibilities during this year.
- CFO **Dr. Stefan Kirsten** will step down from Vonovia's Management Board at his own request, effective from the end of the AGM on May 9, 2018. Dr. Kirsten wants to enable the company to take the next steps in its development under the financial leadership of Helene von Roeder as CFO of Vonovia SE, who will assume joint responsibility for all financial functions. Dr. Kirsten will maintain ties with Vonovia as a supervisory board member of various relevant holdings as well as in a consulting role.
- As previously announced, if the tender offer for Buwog AG is successful, **Daniel Riedl**, Chairman of Buwog AG's Management Board, will join Vonovia SE's Management Board at the next Annual General Meeting.

Transaction timeline

| | | |
|--|-------------|---|
| | 18 Dec 2017 | Announcement of the intention to make a voluntary take-over offer |
| | 05 Feb 2018 | Publication of the offer document |
| | 06 Feb 2018 | Start of the initial acceptance period |
| | 12 Mar 2018 | End of the initial acceptance period |
| | 15 Mar 2018 | Publication of final result of initial acceptance period by Vonovia |
| | 16 Mar 2018 | Publication of final result of initial acceptance period in the official gazette (Wiener Zeitung) |
| | 16 Mar 2018 | Start of the additional acceptance period |
| | 26 Mar 2018 | Payment and settlement (relating to acceptance during initial acceptance period) |
| | 07 May 2018 | Consolidated Q1 reporting incl. Buwog |
| | 18 Jun 2018 | End of the additional acceptance period |

Assuming a tender ratio of at least 50% plus 1 share during the initial acceptance period and hence a successful transaction, Vonovia would take control just a few days prior to the end of the first quarter. In this case, for the release of Vonovia's Q1 results, Buwog would be consolidated in terms of balance sheet numbers but not in terms of income and cash flow statements.

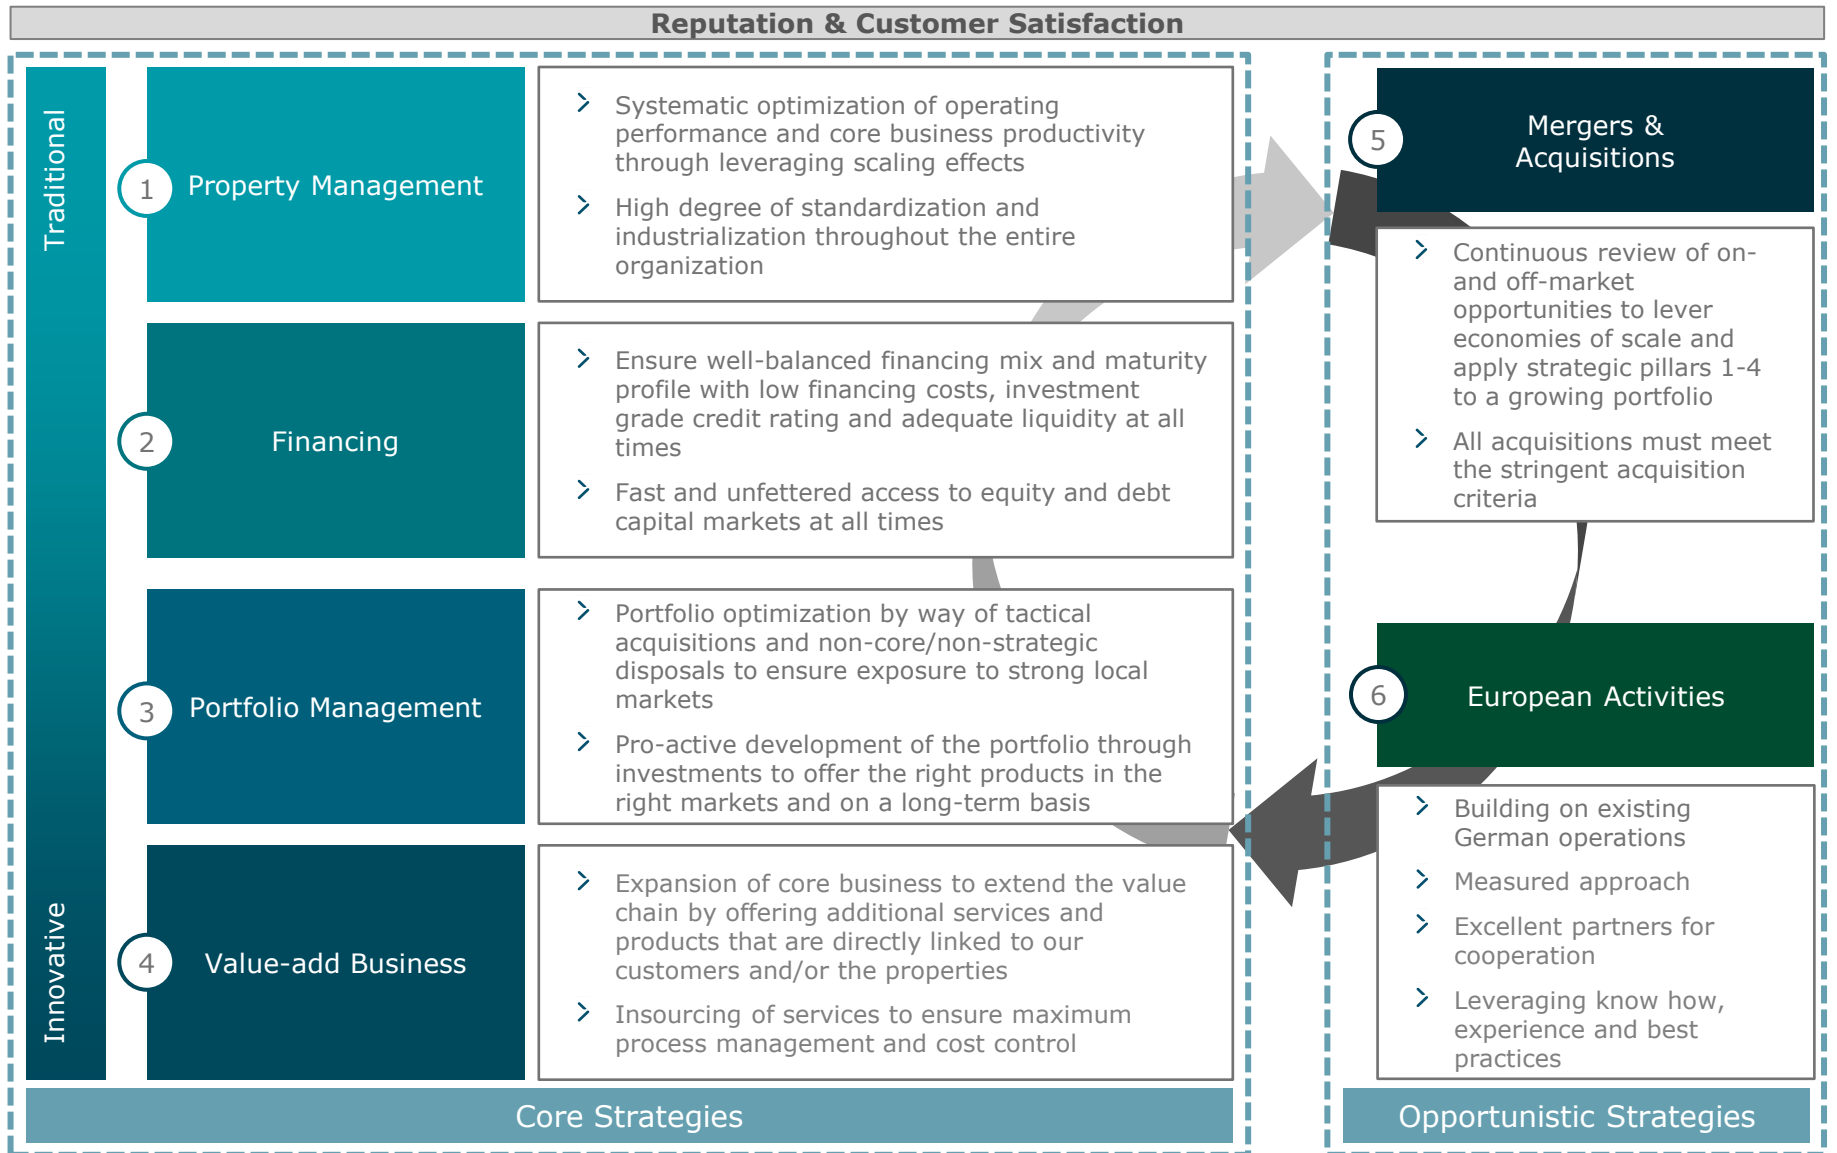

While a detailed guidance for Vonovia including Buwog would not be possible at that point, we would be looking to provide the market with our best estimate for 2018 FFO 1.

- Vonovia expects to perform a **portfolio valuation update as per June 30, 2018**, as
 - ongoing value growth can be observed in many markets throughout Germany;
 - Vonovia's internal accounting policies call for an interim valuation at the end of Q2 if the expected value shift is considered material; and
 - current market observations suggest a significant value uplift
- For practical reasons and similar to Q2 2017, the valuation exercise will not cover the entire portfolio but a meaningful subset.
- The **valuation scope** is currently envisaged to include
 - The 20 largest German cities by fair value
 - Additional locations for which meaningful value growth is expected
 - Vienna

- Vonovia gave investors the choice between a cash dividend and a scrip dividend for the first time in the context of the 2017 AGM.
- Nearly half of all shareholders opted for the scrip dividend.
- For the 2018 AGM to be held on May 9, 2018, in Bochum, Vonovia intends to once again propose an optional scrip dividend, **provided that the share price is not materially below the Adj. NAV per share when the final decision is taken.**
- The specifics will be laid out in the convening notice and related documentation to be published on or before March 29.
- The final decision on whether to offer a scrip dividend alternative will be taken by the Supervisory Board just before the AGM.

- Vonovia's 2018 Capital Markets Day will take place in Berlin
- Agenda
 - June 4: Dinner at ca. 20:00
 - June 5:
 - Presentations and Workshops
 - Neighborhood Development Project in Berlin Tegel
 - Development Business
 - Value-add Business: Energy
 - Property Tour
 - CMD will finish in time for flights out of Berlin starting at around 18:30
- An invitation including the agenda, the exact location and the registration link will be sent out in April.
- Following the CMD, we will be starting our bi-annual perception study and appreciate your cooperation in case you are contacted by h2glenfern.

Proven 4+1 Strategy is Evolving into 4+2 Strategy

1. Property Management

- Operating KPIs fully under control
- Steady efficiency gains through economies of scale, digitization, standardization and process optimization

2. Financing

- Lower leverage
- Reduced interest expense
- Increased unencumbrance ratio and debt diversity
- Well-established player in the corporate bond market

3. Portfolio Management

- More than 51k non-core units sold since IPO (28% of IPO portfolio volume)
- Number of portfolio locations reduced by 29%; portfolio now concentrated across 15 growth regions
- Investment program grown from €71m for 2013 to €1bn for 2018 and annually going forward

Investment track record (€m; includes modernization and space creation)

4. Value-add Business

- Insourcing of services to increase customer satisfaction and extend the value chain
- Leveraging the B-to-C nature of the business and the long-term customer relationship
- Most dynamic and innovative part of the business

Adj. EBITDA Value-add Business (€m)

...Leading to Sustainable FFO 1 Growth and an Attractive Dividend Policy

Months per year until costs are earned by recurring income¹ and months exclusively worked for dividend

Sustainable and growing cash flow with attractive pay-out ratio

¹ Rental income + EBITDA Value-add Business and Other; excluding sales effects. ² Intended to be proposed to the Annual General Meeting. ³ Midpoint guidance.

- ✔ The successful development since the IPO continued in 2017, resulting in a compelling 5-year positive track record.
- ✔ In light of the sustainable growth trajectory on which we have put the company, we remain confident in our outlook for 2018 and beyond.
- ✔ Market fundamentals continue to be supportive.
- ✔ Q1 reporting on May 7 with first estimate on FFO 1 contribution from Buwog if tender offer is successful.
- ✔ Changes in the Supervisory Board and Management Board represent a smooth transition that safeguards the long-term stewardship of the company.

Note: Difference between number of resi units in strategic locations and number of resi units in strategic clusters is due to privatization units that are included in the strategic locations but not in the strategic clusters.

Investment Program on an Increasingly Broader Footing

| | | |
|--------------------------------|--------------------------|--|
| Investment Program Evolution ↑ | Neighborhood Development | Full-scale approach to developing entire areas in a city, taking economic and social criteria into account. |
| | Space Creation | New constructions between existing buildings and additional floors on buildings and on land that we already own. |
| | New Initiatives | Primarily bathrooms and kitchens modernized upon tenants' initiatives as well as replacement of old heating systems with modern installations. |
| | Upgrade Building (UB) | Energy-efficient modernization of the building shell and communal areas (heat insulation for facades and roofs, windows, heating systems). |
| | Optimize Apartment (OA) | Refurbishment of turnover apartments (bathroom, flooring, wiring), usually senior-friendly modernization. |

Investment Program Evolution

The investment programs have gone through an evolution and have become a comprehensive approach to residential real estate investments.

Labels in diagram: OA, UB, Space creation, Neighborhood development

- The investment program has not only grown in size but also in complexity.
- While a **yield-to-cost** calculation is appropriate for investments that generate relatively quick pay-back periods, such as OA or UB, the larger investments space creation and neighborhood development generate value only over a longer period of time.
- For these types of projects, an **IRR** calculation is more adequate and after using it for internal reporting purposes already from the program inception, we will now use this metric in the external reporting as well.
- The **target IRR** for the **overall investment** program is **>8%**.
- OA and UB will continue to be measured against a 7% yield-to-cost target.

Wood

Max. 3-4 floors
Full flexibility re room sizes
Light-weight framework construction

Bochum, Insterburgerstraße

Floor space: 897 sqm
14 apartments
Completion: December 2016

Integrated element of Vonovia's business model

- With ca. 350,000 apartments throughout Germany, Vonovia is the country's leading residential real estate company. This role in the housing landscape imposes on us a particular responsibility to actively shape the development of the housing industry.
- We aim to live up to the responsibility by pursuing a continuous dialogue with our stakeholder groups, and by considering social and ecological issues in our core activities. A key priority for us is to use our business model and our holistic approach to help resolve the most urgent challenges in the housing industry and make a positive contribution to social development.

Sustainability reporting at Vonovia

- Separate Sustainability Reporting Unit at Vonovia.
- Start Sustainability Reporting in 2015 with our first sustainability report published in 2016, based on GRI G4 guidelines.
- Publication of second Sustainability Report in 2017, based on the new GRI standards (published in October 2016), report is available at: <http://investoren.vonovia.de/websites/vonovia/English/7033/sustainability.html>
- Vonovia received the EPRA Silver Award for the 2016 Sustainability Report

- Sustainability Report for 2017 to be published in June 2018

“Our sustainability approach results directly from our business model, on the one hand, and also addresses developments that influence our business, or which we can influence, on the other.”

Vonovia’s Sustainability approach

- Vonovia implements extensive measures to maintain and develop its portfolio, in particular, measures to improve the **energy efficiency** of the stock. This allows us to make a significant contribution to protecting our climate. At the same time, well-insulated apartments increase efficiency and simultaneously reduce ancillary expenses for our customers.

- A nice, stable environment is part of a good residential atmosphere. Therefore, we become involved beyond our buildings and set trends with cities, companies and city planners, as well as with associations, initiatives and, last but not least, with our local customers for the **sustainable development of entire neighborhoods**.

Sustainability: Establishment within Vonovia

- At the highest level, the **CEO** of Vonovia SE is responsible for sustainability.
- The **Audit Committee** in particular handles sustainability on behalf of the Supervisory Board.
- Vonovia established a new function, **sustainability specialist**, in 2017, in order to ensure that sustainability issues can be tackled in a more structured, cross-departmental manner and to expand our dialogue with stakeholders.

Sustainability Stakeholder-Groups at Vonovia

We maintain regular and close contact with suppliers and service providers, the media, NGOs and the public sector.

FY Sustainability Facts and Figures

- **Space creation for affordable living:** annual run rate of 2,000 new apartments via floor addition, extension und densification
- **10 Neighbourhood Developments projects** in 2018: We intend to increase the annual number from 2019 onwards.
- We pursue the goal of **renovating** more than 3 % of our building stock with regard to energy-efficiency every year.
- We will be investing in **upgrading heating systems** over the next few years, thus achieving annual CO2 savings of around 7,000 metric tons. And we will be investing in energy-efficient building upgrades. This is likely to result in a reduction in CO2 of around 28,000 metric tons in 2018. Our aim is to keep these investments at a stable level in the coming years.
- **Expansion of renewable energy sources, the targeted purchase of renewable energies and the entry into own electricity production** via photovoltaic systems and cogeneration plants. We plan the construction of 5 large-scale cogeneration units in 2018 which will produce ca. 2 million kWh of electricity per year. We intend to add more than 500 photovoltaic facilities to our portfolio annually over the next years with an annual power generation of ca. 15 million kWh, corresponding to CO2 savings of approx. 8,500 metric tons per year.

Materiality Matrix

| Sustainable Management | Society and Customers | Environment | Employees |
|---|--|---|------------------------------------|
| 1 Adjustments to Reflect Climate Change | 5 Portfolio Maintenance | 12 Impact of Transportation/ Logistics | 17 Initial and Further Training |
| 2 Compliance and Anti-Corruption | 6 Affordable Rents | 13 Company Environmental Protection | 18 Occupational Health and Safety |
| 3 Long-Term Growth | 7 Customer Health and Safety | 14 Energy Efficiency and Reducing Greenhouse Gas Emissions in the Portfolio | 19 Co-Determination |
| 4 Open Dialogue with Society | 8 Neighborhood Development | 15 Environmental Protection in the Portfolio | 20 Diversity and Equal Opportunity |
| 22 Social and Labor Standards in the Supply Chain | 9 Creation of Homes | 16 Environmental Protection in Connection with Renovation and New Construction Measures | 21 Work-Life Balance |
| 23 Environmental Standards in the Supply Chain | 10 Service Quality and Customer Satisfaction | | |
| | 11 Social Commitment | | |

Sustainable Corporate Governance:

- Long-term growth: Basis to Vonovia Business Model.
- Compliance and Anti-Corruption: Implemented Code of Conduct within Vonovia.
- Adherence to Labor, Social and Environmental Standards in the Supply Chain: Business Partner Code for subcontractors and suppliers: e.g. ruling out of illicit employment, payment of at least legal minimum wage.

Society and Customer Interests:

- CSI (Customer Satisfaction Index) is an element used in determining Management Board remuneration.
- Neighbourhood development: not only maintenance, modernization, shaping the residential environment, but also supporting social or cultural facilities or educational institutions
- Social Commitment: several initiatives, e.g. Vonovia Foundation, Vonovia Mieterstiftung e.V.

Climate and Environmental Protection:

- Reduction of energy and emission consumption: e. g. modernization of energy systems, modern boilers, intelligent thermostats. Further measures against climate change: e. g. expansion of renewable energy sources, targeted purchasing of renewable energies, entry into own electricity production via photovoltaic systems

Employees:

- Several health programs, support work-life-balance, participation in company's success
- Employees from 60 different nations
- 2016: GdW: Award as an exemplary training company and from Focus Money the award "Germany's best training companies".
- German Olympic Sports Federation, representatives of the Sports Ministers' Conference and the German Chambers of Industry and Commerce honoured Vonovia as a top sports-friendly company in 2017

Rental regulation safeguards high degree of stability

- Contrary to most other jurisdictions such as the USA, rental growth in Germany is regulated and not directly linked to CPI, GDP development etc.
- Rents are regulated via "Mietspiegel" (city-specific rent indices), which look at the asking rents of the previous four years to determine a rent growth level for existing tenants for the next two years.

Germany: regulated market ensures sustainable rent growth

USA: rent growth is highly volatile

Sources: Federal Statistics Office, GdW (German Association of Professional Homeowners), REIS, BofA Merrill Lynch Global Research, OECD.
 Note: Due to lack of q-o-q US rent growth data, the annual rent growth for a year is assumed to also be the q-o-q rent growth of that year.

German Residential – Landlords Benefit from Structural Imbalance between Supply and Demand

New supply falls short of demand

- Consensus estimates see a current shortage of around 1 million apartments in urban areas. Three main constraints stand in the way of material changes in the short and even medium term:
 - Building permits often take several years because city administrations lack qualified personnel.
 - Severe shortage of building capacity after years of downsizing.
 - Substantial gap between in-place values and market replacement cost render construction in affordable segment economically unfeasible.

Residential building permits and new construction volume ('000 units)

Growing number of smaller households

- While the overall population in Germany is expected to slightly decline, the number of households is forecast to grow until at least 2035 with a clear trend towards smaller households.
- The household growth is driven by various demographic and social trends including divorce rates, employment mobility etc.

Distribution of household sizes (million)

Fragmented ownership structure

- Germany is the largest housing market in Europe with ~42m housing units, of which ~23m are rental units.
- Ownership structure is highly fragmented and majority of owners are non-professional landlords.
- Listed sector represents ~4% of total rental market.

Ownership structure (million units)

Sources: German Federal Statistics Office, GdW (German Association of Professional Homeowners). 2035(E) household numbers are based on trend scenario of the German Federal Statistics Office.

Urbanization trend across Europe

% of total population living in cities

Increasing affordability in Germany

- > Affordability in Germany is higher than in the UK or France.
- > Whereas most other European countries saw an increase, the share of rent-related payments in relation to disposable income declined in Germany between 2005 and 2015.

Rent as % of disposable household income

Share of disposable household income spent on rent, water, electricity and fuel

European Metropolitan Areas

Large Markets and Low Homeownership Ratios

Size of rental market (rent p.a. estimate, €bn)

- Critical mass of sizeable residential markets in Germany just as in other European metropolitan areas.

Large metropolitan areas with low homeownership ratios

- Low home ownership is not a phenomenon unique to Germany but can be seen in metropolitan areas across Europe.

Sources: Federal Statistics Office, Eurostat, JLL Research, own calculations

- On February 7, the coalition partners CDU, CSU and SPD signed a **coalition agreement**¹ that will serve as the basis for their work in the current legislative period. The following is an overview of the main elements of the coalition agreement as far as the housing market is concerned.
- The overriding objective of the coalition agreement is to **secure the affordability of housing for tenants while safeguarding modernization investments that are aimed towards successfully coping with climate change and demographic challenges**. The proposed measures in terms of regulation suggest that the coalition partners are specifically targeting rogue landlords, who push the envelope by carrying out costly modernization at the expense of their tenants, as well as speculative land buyers.

Rental cap („Mietpreisbremse“)

Coalition Agreement

The coalition partners want to make it mandatory for landlords to disclose the previous rental level.

Background: A new letting rent currently must not be more than 10% above the local comparable rent. This is national law that is applied by federal states in areas that are defined as “strained housing markets” by the respective municipalities. As such, the Mietpreisbremse does not apply to every location in Germany. Two federal states, NRW and Schleswig Holstein, have even passed legislation to discontinue the Mietpreisbremse in their jurisdiction. Landlords, however, are not forced to relet below the previous rent. Currently there is no mechanism to make the previous rent transparent to potential new tenants.

Expected Impact

This suggests that the Mietpreisbremse will not disappear as a concept. It will make it more difficult for rogue landlords to claim that the previous rent was more than 10% above the local comparable.

Vonovia has respected the existing legislation and will continue to do so. Vonovia does not expect this new disclosure requirement to have a material impact on its business.

¹ See https://www.cdu.de/system/tdf/media/dokumente/koalitionsvertrag_2018.pdf?file=1 for the full text of the coalition agreement (German only)

| Modernization allocation | |
|--|--|
| Coalition Agreement | Expected Impact |
| <p>Article 559 of the German Civil Code provides that up to 11% of the investment amount of a modernization project can be allocated to the annual rent of the property in perpetuity, provided the underlying work is modernization/value enhancing (i.e. not maintenance).</p> <p>The coalition partners want to reduce the 11% to 8%. This shall only apply to areas with a lower "Kappungsgrenze," i.e. locations where rent growth on existing tenancies can be no more than 15% over three years (instead of 20%).¹ This is within the discretion of the federal states and implemented in various ways by some and not by others. The coalition agreement states that this measure shall be reviewed after five years.</p> | <p>This measure will have a larger impact on landlords that carry out expensive modernizations and a smaller impact on landlords that do more efficient modernization work.</p> <p>Historically, Vonovia has had an average allocation of around 7% of the investment amount, which is also the required average hurdle rate for approving the annual modernization budget. Hence, a reduction from 11% to 8% would have a minor impact on Vonovia.</p> <p>As this applies to some and not to other regions, Vonovia will also have the opportunity to direct investment funds to those regions that are not affected.</p> |

| €3.00 per sqm rent growth cap following a modernization | |
|---|---|
| Coalition Agreement | Expected Impact |
| <p>The coalition partners want to cap the absolute rent growth after a modernization to a maximum of €3.00 per sqm and extend the moratorium on modernization-related rent growth form currently three to six years.</p> | <p>This measure appears to be primarily aimed towards rogue landlords who use the modernization allocation to carry out luxury modernizations in order to implement excessive rent growth. Business models that push the envelope on the back of tenants by carrying out costly modernizations will find this to be more difficult going forward.</p> <p>Historically, out of thousands of modernization projects carried out by Vonovia only a small fraction have led to a rent growth of more than €3 per square meter, so this measure will not impact Vonovia.</p> |

Extension of validity period for Mietspiegel

Coalition Agreement

The coalition partners want to extend the validity period of Mietspiegel from currently two years to three years. This shall only apply to Detailed Mietspiegel (“qualifizierte Mietspiegel”).

Expected Impact

Out of a total of 275 Mietspiegel in Germany, 105 are Detailed Mietspiegel and would be affected; the remaining 170 are Simple Mietspiegel and would not be affected. Markets with a Detailed Mietspiegel might see a time delay in rental growth or an expansion of the time frame under which rent growth can be implemented. It is unlikely that the main intended impact, lower costs for municipalities, will actually materialize.

This legislation would have a limited impact on Vonovia and mostly affect the timing of rent growth.

Extension of reference period for Mietspiegel

Coalition Agreement

The coalition partners want to review the length of the reference period that serves as a basis for drafting a new Mietspiegel. The current reference period is 4 years.

Expected Impact

The coalition agreement only includes one sentence, expressing the parties’ intentions to “review” the reference period without any further specifics. The absence of any concrete language or plans suggests that there was little common ground during the coalition talks, hence the rather unspecific reference to review the issue at a later date. Any legislation in that direction would most likely prove to be rather difficult given the absence of comparable data on a continuous basis, as criteria and other parameters in the different Mietspiegel keep changing.

In the absence of any specifics on this subject, the actual impact this could have on Vonovia cannot be estimated at this point. It is clear, however, that an extension of the reference period would have material negative consequences on the entire industry, and Vonovia would also be affected.

| Subsidy for homebuyers | |
|---|--|
| Coalition Agreement | Expected Impact |
| <p>The coalition partners want to grant €1,200 per annum and per child for up to ten years to families who are looking to buy or build, provided their taxable household income does not exceed certain thresholds (€90k in cases of families with one child and an additional €15k for each additional child)</p> | <p>In light of the prices in most urban areas this measure is unlikely to help many families afford a home in a city.</p> <p>Vonovia does not expect any substantial upward pressure on prices for its assets on the basis of these plans.</p> |

| Subsidies | |
|--|---|
| Coalition Agreement | Expected Impact |
| <p>The coalition agreement includes various examples how the new government would aim to subsidize energy efficient modernizations and renovations to enable the elderly to live in their homes longer.</p> <p>The coalition partners have also agreed to promote serial and modular construction and expressed their intention to support the individual federal states to streamline the building permit process and to investigate possibilities for serial construction permissions (potentially not dissimilar to the car industry, where a certain model receives standard approval rather than each vehicle being approved individually).</p> | <p>Modernization of the housing stock and more affordable construction of new apartments are key for the German housing market.</p> <p>Vonovia is a strong supporter of energy-efficient modernization, renovation of apartments for the elderly and intelligent, affordable space creation, as indicated by the annual €1bn investment program. Any further progress or additional support in this direction would be welcomed as a positive for the business.</p> |

Valuation methodology for German residential properties is primarily based on market prices for assets – not on interest rates

- While market prices are affected by general interest rate levels, there is **no significant correlation**.
- **Other factors** such as supply/demand imbalance, rental regulation, market rent growth, location of assets etc. **outweigh the impact of interest rates** when it comes to pricing residential real estate.
- The **steep decline in interest rates** (down by 760bps since 1992) is **not mirrored by asset yields** (down by 120bps since 1992).
- Asset yields outperformed interest rates by 240bps on average since 1992 and 550bps in June 2016.

German residential asset yields (%) vs. EUR interest rates (%)¹

No correlation pattern between interest rates and asset yields¹

¹ Yearly asset yields vs. rolling 200d average of 10y interest rates

Three Valuation Layers with Different Volatilities

➤ High degree of stability and predictability of underlying business (layer 1) and portfolio valuation (layer 2) is not reflected in share price development (layer 3), as equity markets appear to apply valuation parameters that are substantially less material for Vonovia’s operating performance.

Increasing level of perception and judgment

| Layer | Development | Main drivers |
|--|-------------|--|
| <p>3</p> <p>Stock Market Valuation (Stock price € per share)</p> | | <ul style="list-style-type: none"> • Only partly driven by performance and portfolio valuation • Negatively correlated to bund yields and interest rates • Subject to additional macro considerations |
| <p>2</p> <p>Portfolio Valuation (Adj. NAV € per share)</p> | | <ul style="list-style-type: none"> • Market prices for assets are much more relevant than interest rate levels • Additional material factors are supply/ demand imbalance and sustainable market rent growth |
| <p>1</p> <p>Cash Flow (FFO 1 & Dividend € per share)</p> | | <ul style="list-style-type: none"> • Regulated market • No cluster risk due to high degree of granularity • Robust business model |
